FINALLY BETTER PRINTING!

steadyPRINT®
meets SAP®

*Independent, flexible, highly available, **secure**.*

SAP® Certified
Integration with SAP S/4HANA®

steadyPRINT raises the document output from SAP® to the next level.

As an SAP-certified OMS (Output Management System), steadyPRINT guarantees the smooth processing and control of documents as well as reliable feedback of the printing process to SAP.

As an interface between SAP and Windows, steadyPRINT offers a variety of advantages from which SAP users can now also benefit for the first time.

steadyPRINT® & SAP®

RELIABLE FEEDBACK = RELIABLE PROCESSES

steadyPRINT reports the job and device status of the Windows printer queue to the SAP application servers via the *coupling type E*. If printing is not possible, this information is also communicated immediately in order to ensure your processes. Coupling types F and L are also supported.

HIGHLY AVAILABLE & HIGH-PERFORMANCE PRINTING ENVIRONMENT

steadyPRINT enables reliability at print server and printer level so that a smooth process is guaranteed even if one component fails. The integrated Load Balancing ensures stability and optimum performance through intelligent load distribution even with high print volumes – regardless of whether printing is done from the head office or a branch office.

BACKUP/RETRIEVAL OF PRINT JOBS

With steadyPRINT you can access already printed or faulty print jobs subsequently and print them again or further process them if required.

PROCESS OPTIMIZATION / EFFICIENCY INCREASE

The steadyPRINT vFlow technology enables a targeted document control and the optimization of your processes by means of workflows which automatically process recurring tasks. In this way, work steps are accelerated, errors are avoided and costs are reduced.

MINIMAL ADMINISTRATIVE EFFORT

The central administration console *steadyPRINT Center* enables an intuitive and clear administration of the entire printing environment including driver management, monitoring and much more.
steadyPRINT supports several independently installed SAP systems with one instance, thus reducing complexity and saving resources.

SECURITY & COMPLIANCE

Thanks to extensive security mechanisms (access control, encryption, logging, SecurePrint), steadyPRINT provides additional protection for your information, supports you in complying with applicable standards and specifications and contributes to the GDPR-compliant handling of sensitive data.
