

IMPROVED PRINTING

in Citrix

steady**PRINT**

Citrix
Ready™

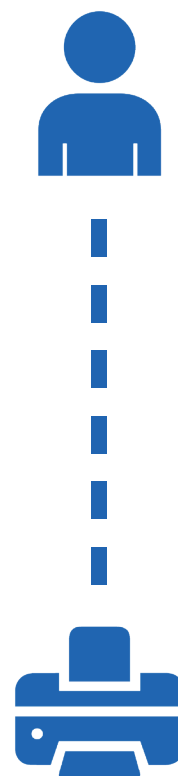

Central management and flexible provision of printers.

steadyPRINT – the all-round carefree package: Management of printer connections, driverless printing, monitoring & reporting of the entire print environment, print server reliability & migration and many more.

Provision of printers in Citrix

- + Assignments for computers, groups, users and organizational units
- + “Real client name detection” for Citrix Virtual Apps and Desktops
- + Device-independent (Windows, Linux, Apple)
- + Location-based assignments via IP areas (Client IP)
- + User Self Service for printer connections established by the user
- + Change of printers without re-login (on-the-fly)
- + Printer adjustment when changing sessions

Virtual printer for special systems

- + For all special systems (e.g. DATEV, ERP systems, HIS, etc.)
- + Relocation of the printer management from the special application to the clearly structured management console of steadyPRINT
- + Reliable printing for trouble-free printing processes

Driverless printing with steadyPRINT VPD

- + Virtual printer driver steadyPRINT VPD for universal application
- + Various assignment types for each scenario
- + No driver installation on the Client
- + Cluster functionality for replacing the print server name by a freely selectable cluster name

Print server reliability

- + Even in terminal server environment: printer adjustment in the background
- + When using steadyPRINT VPD, an adjustment of the connections is not necessary: The actual printer connection is created shortly before printing.
- + Reliable printers for more flexible printing processes

The all-round carefree package

- + Login processes up to 30% faster as compared to group policies
- + Lower support call volume, minimal administrative effort
- + Central and intuitive management of print environments of all sizes
